Chikkamagaluru, KA, India | +91 7019141451 | vinuthaa1010@gmail.com | linkedin.com/VINUTHA | github.com/Vinutha1010

PROFESSIONAL SUMMARY

Detail-oriented Information Science and Engineering graduate (CGPA: 9.13/10.0) with hands-on experience building full-stack web applications, machine learning systems, and blockchain prototypes. Seeking an entry-level Software Engineer role to apply problem-solving skills and contribute to scalable software solutions.

TECHNICAL SKILLS

Languages: Java (DSA, OOP, Multithreading), C, C++, JavaScript, TypeScript, Python, SQL
Web & APIs: React.js, Node.js, Express.js, REST APIs, HTML, CSS
Databases & Tools: MySQL, PostgreSQL, MongoDB, JDBC, Git, GitHub, Unix/Linux, Power BI
Core CS Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Computer Networks, Cybersecurity

PROFESSIONAL EXPERIENCE

Codveda Technologies Jul 2026 – Present
Java Development Intern

- Participate in the software development lifecycle (SDLC) designing, testing, and maintaining core Java applications following OOP principles.
- Developed a multithreaded client-server application using Java Sockets to enable real-time concurrent message broadcasting across network clients.
- Implemented persistent database connectivity using JDBC and MySQL to handle multi-table CRUD operations and guarantee transactional integrity.
- Executed regular unit testing and debugging routines to optimize software performance and uphold high code quality standards.

KEY TECHNICAL PROJECTS

Disaster SHero | *Digital Disaster Preparedness Platform* Aug 2025 – Nov 2025

- Tech Stack:** React, TypeScript, Node.js, Express.js, MySQL, REST APIs
- Engineered a full-stack disaster management platform delivering automated real-time emergency alert broadcasts using React and Node.js.
- Architected Role-Based Access Control (RBAC) and detailed admin analytics dashboards to securely manage fine-grained user permission levels.
- Maintained 90%+ code quality through continuous Git/GitHub version control workflows, automated unit testing, and peer code reviews.

Gramin Shield | *AI-Powered Adaptive Digital Payment App*

- Tech Stack:** Python, Machine Learning, Adaptive Security, FinTech
- Designed a rural FinTech application with multi-tier adaptive transaction security; trained ML models achieving 94%+ fraud detection accuracy.
- Implemented dynamic OTP authentication routines for elevated-risk transactions without impacting overall system latency.

Blockchain-Based E-Voting Architecture Prototype

- Tech Stack:** Decentralized Identity (DID), Cryptography, MongoDB
- Developed a decentralized e-voting system using Decentralized Identity (DID) and MongoDB immutable ledgers to prevent double-voting.

EDUCATION

Adichunchanagiri Institute of Technology Chikkamagaluru, KA
Bachelor of Engineering in Information Science and Engineering | CGPA: 9.13/10.0
2023 – 2027

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Elite:** DSA using Java (IIT Kharagpur)
- NPTEL Elite:** Joy of Computing with Python
- Simplilearn:** AWS Services Fundamentals
- 1st Place Winner:** PALS Think2Impact Workshop
- MongoDB Certified:** Document Model & Atlas
- Cisco Academy:** Introduction to Cybersecurity
- Skill India Digital:** AI Certification (270 Hrs)
- SIH 2025 Participant:** Internal Hackathon Round

LEADERSHIP & EXTRACURRICULARS

Department Event Organizer: Co-organized 5 technical symposiums and coding workshops for 150+ students at Adichunchanagiri Institute of Technology, managing scheduling, event logistics, and technical platform setup.
