PROFESSIONAL SUMMARY

Detail-oriented Information Science and Engineering graduate (CGPA: 9.13/10.0) with hands-on experience building full-stack web applications, machine learning systems, and blockchain prototypes. Seeking an entry-level **Software Engineer** role to apply problem-solving skills and contribute to scalable software solutions. Proficient across the complete **Software Development Lifecycle (SDLC)**, agile practices, **unit testing**, and version control.

TECHNICAL SKILLS

Languages:	Java (DSA, OOP, Multithreading), C, C++, JavaScript, TypeScript, Python, SQL
Software Engineering:	Software Development Lifecycle (SDLC), Agile Practices, Unit Testing, Version Control
Web & APIs:	React.js, Node.js, Express.js, REST APIs, HTML5, CSS3
Databases & Tools:	MySQL, PostgreSQL, MongoDB, JDBC, Git, GitHub, Unix/Linux, Power BI
Core CS Concepts:	Data Structures & Algorithms (DSA), OOP, DBMS, Computer Networks, Cybersecurity

PROFESSIONAL EXPERIENCE

Codveda Technologies — Java Development Intern Jul 2026 – Present

- Participate in the software development lifecycle (SDLC) designing, testing, and maintaining core Java applications following OOP principles.
- Developed a multithreaded client-server application using Java Sockets to enable real-time concurrent message broadcasting across network clients.
- Implemented persistent database connectivity using JDBC and MySQL to handle multi-table CRUD operations and guarantee transactional integrity.
- Executed regular unit testing and debugging routines to optimize software performance and uphold high code quality standards.

KEY TECHNICAL PROJECTS

Disaster SHero — Digital Disaster Preparedness Platform

Tech Stack: React, TypeScript, Node.js, Express.js, MySQL, REST APIs

- Engineered a full-stack disaster management platform delivering automated real-time emergency alert broadcasts using React and Node.js.
- Architected Role-Based Access Control (RBAC) and detailed admin analytics dashboards to securely manage fine-grained user permission levels.
- Maintained 90%+ code quality through continuous Git/GitHub version control workflows, automated unit testing, and peer code reviews.

LockedIn — AI-Powered Technical & Mock Interview Platform

Tech Stack: React, TypeScript, Node.js, Express.js, Prisma ORM, Google Gemini AI, REST APIs

- Engineered an end-to-end interview simulation platform integrating Google Gemini AI and Monaco Editor to evaluate technical and algorithmic coding rounds in real time
- Developed a secure, in-browser JavaScript sandbox code runner with AST stripping, multi-test-case validation, and 3000ms loop timeout protection.
- Architected a curated library of 191+ questions spanning DSA, CS fundamentals, and aptitude with automated rubric scoring across code quality and communication.

Gramin Shield — AI-Powered Adaptive Digital Payment App

Tech Stack: Python, Machine Learning, Adaptive Security, FinTech

- Designed a rural FinTech application with multi-tier adaptive transaction security; trained ML models achieving 94%+ fraud detection accuracy.
- Implemented dynamic OTP authentication routines for elevated-risk transactions without impacting overall system latency.

EDUCATION

Adichunchanagiri Institute of Technology — Chikkamagaluru, KA
Bachelor of Engineering in Information Science and Engineering | CGPA: 9.13 / 10.0

2023 – 2027

CERTIFICATIONS & ACHIEVEMENTS

- | | |
|---|--|
| • NPTEL Elite: DSA using Java (IIT Kharagpur) | • MongoDB Certified: Document Model & Atlas |
| • NPTEL Elite: Joy of Computing with Python | • Cisco Academy: Introduction to Cybersecurity |
| • Simplilearn: AWS Services Fundamentals | • Skill India Digital: AI Certification (270 Hrs) |
| • 1st Place Winner: PALS Think2Impact Workshop | • SIH 2025 Participant: Internal Hackathon Round |

LEADERSHIP & EXTRACURRICULARS

Department Event Organizer: Co-organized 5 technical symposiums and coding workshops for 150+ students at Adichunchanagiri Institute of Technology, managing scheduling, event logistics, and technical platform setup.
